Objective

Computer Science Engineering undergraduate (4th Semester, CGPA 8.98) with hands-on experience in Python-based data analysis, statistical reporting, and visualization. Seeking a Data Science Internship to apply skills in data preprocessing, exploratory data analysis, and predictive modeling on real-world projects in a remote, collaborative setting.

Technical Skills

Programming: Python, C/C++, Java

Data Analysis & Preprocessing: Pandas, NumPy, data cleaning, data transformation, statistical analysis

Data Visualization & Reporting: Seaborn, Matplotlib, summary reporting of analytical findings

Database & BI Tools: MySQL (JOIN, GROUP BY, aggregate functions), Power BI (dashboard design, data cleaning)

Tools & Version Control: Jupyter Notebook, GitHub, Git

Currently Learning: Machine learning fundamentals and predictive modeling (IBM Data Science Certification, in progress)

Projects

Customer Churn Analysis **(GitHub)**

- Analyzed a customer churn dataset to identify key factors influencing customer retention and churn behavior, supporting data-driven decision-making.
- Performed data preprocessing (cleaning, transformation) and exploratory data analysis using Python (Pandas, NumPy) to prepare structured data for further statistical and predictive analysis.
- Built visualizations with Seaborn to highlight churn patterns and customer demographics, and documented findings in a clear analytical summary.

E-Commerce Sales Analysis **(GitHub)**

- Analyzed an e-commerce sales dataset using SQL to identify sales trends, top-performing products, and customer purchasing patterns.
- Wrote SQL queries (JOINs, GROUP BY, aggregate functions) to extract revenue distribution and category-wise performance, and summarized findings to support business reporting.

Netflix Content Analysis Dashboard (Power BI) **(GitHub)**

- Cleaned and preprocessed a Netflix dataset of over 8,800 titles, handling missing values and inconsistencies to prepare it for analysis.
- Designed an interactive Power BI dashboard to visualize trends in content type, release years, and genre distribution.
- Built visuals to analyze patterns such as movie vs. TV show distribution and content growth over time, presenting findings in an organized, interactive report.

Education

Bachelor of Engineering (B.E.) in Computer Science Engineering
Rajarajeswari College of Engineering, Bengaluru
4th Semester (Currently Pursuing) | CGPA: 8.98

Certifications

- Data Science Virtual Experience Program – British Airways (Forage)
- Cloud Computing Certification – Simplilearn
- Data Science Certification – IBM (In Progress)
